

ArthRed™

INTRODUCED 1997

What Is It?

ArthRed™ contains naturally occurring compounds needed to build and strengthen cartilage and promote healthy joint function.*

Uses For ArthRed™

Joint Function: Hydrolyzed bovine collagen peptides (HBCP) have been the subject of several clinical trials in Europe for the support of healthy joint function. Specifically, HBCP may maintain healthy enzyme function, protecting the cartilage matrix. HBCP supports nutrient and energy consumption by cartilage tissue, stimulating restructuring processes and encouraging the maintenance of a healthy collagen matrix. The results of clinical trials suggest the administration of 7–10 grams per day of HBCP for a minimum of six months. The beneficial nutritive effects of this supplement can be best achieved by making it a regular, permanent addition to the normal diet.*

What Is The Source?

HBCP (hydrolyzed bovine cartilage peptides) is bovine derived. It is similar to what is known as gelatin, or denatured collagen. It is partly hydrolyzed with a molecular weight of approximately 3,000 daltons. HBCP is composed of protein peptides, which are distinguishable from other products like glucosamine or chondroitin that are composed of alternating glucose and protein compounds. This product is approximately 97% protein. The proteins in highest concentration are proline, hydroxyproline, and glycine. Each scoop is 15 cc (1 Tbsp).

Recommendations

Pure Encapsulations recommends 1 scoop per day added to a beverage.

Are There Any Potential Side Effects Or Precautions?

If pregnant or lactating, consult your physician before taking this product. In rare cases, bovine collagen has been associated with nausea, diarrhea or edema. Consult your physician for more information.

Are There Any Potential Drug Interactions?

At this time, there are no known adverse reactions when taken in conjunction with medications. Consult your physician for more information.

ArthRed™

each scoop contains

hydrolyzed collagen peptides (bovine) 8 grams
Enzymatically hydrolyzed from bovine collagen.
Highly purified and soluble in beverages.
1 scoop per day added to a beverage.
