Cardio-C

INTRODUCED SEPTEMBER 2010

What Is It?

PureWay-C® is a rapidly absorbed form of vitamin C with enhanced retention, prolonging biological activity and sustaining key vitamin C-dependent biochemical functions. Rapid uptake vitamin C offers unique support for healthy inflammation balance, microvascular function, lipid antioxidant protection, and C-reactive protein metabolism.*

Uses For Cardio-C

Cardiovascular Support: PureWay-C® is manufactured using a completely novel, proprietary process that combines ascorbic acid with natural lipid metabolites from rice bran wax along with citrus bioflavonoids. The lipid metabolites are vital components of cell membranes and are pivotal in the regulation and control of normal cellular function. In PureWay-C®, the lipid metabolites act as an ascorbic acid carrier to increase intestinal absorption and vascular distribution of vitamin C. These enhanced cellular uptake kinetics allows ascorbic acid to enter cells more quickly and to be better retained in a safe and effective manner. PureWay-C® is directly associated with maintaining normal levels of C-reactive protein as well as providing lipid membrane antioxidant protection, as demonstrated in a human study. PhytoCardio proprietary blend provides powerful free radical scavenging fruit extracts from cranberry and blueberry for targeted lipid membrane antioxidant protection and arterial health. Extracts from cranberry and blueberry have also been shown to influence enzyme activity and gene expression and to maintain normal inflammation and microvascular endothelial function. Pomegranate extract standardized for punicosides offers the antioxidant and vascular benefits associated with pomegranate juice, including healthy lipid metabolism.*

What Is The Source?

Vitamin C is derived from corn dextrose fermentation. Wild blueberry extract is derived from *Vaccinium angustifolium* fruit. Cranberry extract is derived from *Vaccinium macrocarpon* fruit. Pomegranate extract is derived from *Punica granatum* whole fruit and standardized to contain 40% punicosides. Ascorbyl palmitate is derived from corn dextrose fermentation and palm oil. Hypo-allergenic plant fiber is derived from pine cellulose. Maltodextrin is derived from corn. Citrus bioflavonoids are derived from orange peel.

Recommendations

Pure Encapsulations recommends 1-4 capsules daily, in divided doses, with or between meals.

Are There Any Potential Side Effects Or Precautions?

If pregnant or lactating, consult your physician before taking this product. People with the following conditions should consult their doctor before supplementing with vitamin C: glucose-6-phosphate dehydrogenase deficiency, iron overload (hemosiderosis or hemochromatosis), history of kidney stones, or kidney failure. It has been suggested that people who form calcium oxalate kidney stones should avoid vitamin C supplements because vitamin C can convert into oxalate and increase urinary oxalate. Consult your physician for more information.

Are There Any Potential Drug Interactions?

Vitamin C may react with mixed amphetamines (a specific amphetamine combination used to treat narcolepsy and attention deficit disorder) and blood thinning medications. Consult your physician for more information.

Cardio-C

one vegetable capsule contains  V 0

vitamin C (as PureWay-C®) 270 mg
PhytoCardio proprietary blend 80 mg
 providing wild blueberry extract (*Vaccinium angustifolium*) (fruit),
 cranberry (*Vaccinium macrocarpon*) extract (fruit)
pomegranate (*Punica granatum*) extract (whole fruit)..... 50 mg
 (standardized to contain 40% punicosides)
ascorbyl palmitate (fat-soluble vitamin C) 10 mg
other ingredients: hypoallergenic plant fiber, maltodextrin, rice bran wax,
citrus bioflavonoids, vegetable capsule

1-4 capsules daily, in divided doses, with or between meals.
