EmulsiSorb D₃ liquid

What Is It?
EmulsiSorb D₃ liquid provides 1,000 iu vitamin D₃ per drop in an enhanced-absorption form to support bone, cellular and cardiometabolic health.*

Special Features
• Unique emulsification process provides micellized vitamin D₃, minimizing bile dependency and enhancing the bioavailability for optimal absorption*
• Convenient liquid form allows product to be taken directly or mixed in drinks
• Great-tasting vanilla flavor

Uses For EmulsiSorb D₃ liquid

Bone Health: Vitamin D promotes intestinal calcium and phosphorous absorption and reduces urinary calcium loss, essential mechanisms for maintaining proper calcium levels in the body and for healthy bone composition. Clinical studies involving vitamin D supplementation suggest the importance of vitamin D in addition to calcium for bone health. Vitamin D supplementation alone may also support bone health.*

Cardiovascular Support: Vitamin D supports cardiovascular health for some individuals, which may be attributed to its effect on calcium metabolism or possibly by helping to maintain healthy plasma renin function.*

Cellular Health: Studies suggest vitamin D supports colon health by promoting healthy cellular function. Vitamin D is also believed to provide general cellular support potential, including breast and prostate cells, in part by helping to maintain healthy angiogenesis balance, supporting immune cell activity and maintaining healthy cell metabolism. Preliminary evidence suggests that vitamin D may also play a role in maintaining healthy glucose metabolism, since vitamin D receptors are present on the islet cells of the pancreas.*

What Is The Source?
Vitamin D₃ is derived from the cholesterol in lanolin, the fat found in wool. Medium chain triglycerides are derived from coconut and palm oil. Citric acid is derived from corn dextrose fermentation.

Recommendations
Pure Encapsulations® recommends 1 drop daily, with or between meals or as directed by a health professional.

Are There Any Potential Side Effects Or Precautions?
If pregnant or lactating, have any health condition or taking any medication, consult your health professional before use. It is recommended that individuals taking more than 2,000 iu vitamin D per day have their blood levels monitored. Large doses of vitamin D can cause hypercalcemia, signs include headache, weakness, nausea, vomiting, and constipation. Individuals with hyperparathyroidism or kidney disease are at particular risk. Accidental overdose of vitamin D can lead to serious adverse side effects in infants. This product is not intended for infants. Consult a health professional for more information.

Are There Any Potential Drug Interactions?
Vitamin D may result in hypercalcemia in certain individuals taking digoxin or thiazide diuretics. Consult a health professional for more information.
EmulsiSorb D₃ liquid

one drop (0.034 ml) contains
vitamin D (as cholecalciferol) (D₃) ............................................... 1,000 iu
other ingredients: purified water, cellulose, sodium alginate, calcium alginate, medium chain triglycerides, natural vanilla flavor, xanthan gum, citric acid, potassium sorbate, purified stevia extract, rosemary extract (leaf)

Shake well before use.

serving size: 0.034 ml (1 drop)
servings per container: 661
1 drop daily, with or between meals, or as directed by a health professional.

It is recommended that individuals taking more than 2,000 iu vitamin D per day have their blood levels monitored. If pregnant or lactating, consult your health professional before use.
